

Shatakshi Prasad

Data Science — AI/ML

Bhopal, India | [Email](#) | [Portfolio](#) | [GitHub](#) | [LinkedIn](#) | [LeetCode](#) | +91-9340215345

Education

VIT Bhopal University

B.Tech in Computer Science and Engineering – AI/ML Specialization

2023 – 2027

CGPA: 8.56/10

Technical Skills

Languages: Python, SQL, Java

Data Science & Machine Learning: Supervised Learning, Classification, Feature Engineering, Model Evaluation, Scikit-learn, XGBoost, SHAP

Data & NLP: Pandas, TF-IDF, Text Classification, Extractive Summarization, Readability Analysis, Embeddings

Deep Learning: PyTorch, TensorFlow

Generative AI: LLMs, RAG, AI Agents, LangChain, LangGraph, Ollama, Prompt Engineering

Engineering: FastAPI, REST APIs, Pydantic, PostgreSQL, MongoDB, Redis, Docker, MLflow, Git, pytest

Projects

LexiLens – AI Legal Document Intelligence

[GitHub](#)

Python, Scikit-learn, NLP, FastAPI, React, PostgreSQL, PyMuPDF, Docker

- Built an end-to-end **Python NLP pipeline** for PDF, DOCX, and TXT legal documents, including text extraction, clause segmentation, classification, and structured output generation.
- Trained and compared **TF-IDF + Logistic Regression and Linear SVM** models, performing text normalization, feature extraction, and model evaluation across multiple clause categories.
- Developed explainable rule-based risk detection for liability, termination, indemnification, automatic renewal, non-compete, and data-sharing clauses to make predictions auditable.
- Implemented extractive TF-IDF summarization, legal-language simplification, and readability scoring, with results served through FastAPI and persisted in PostgreSQL.

DevFlow – Local AI Software Engineering Review System

[GitHub](#)

Python, Ollama, LLMs, Python AST, FastAPI, React, PostgreSQL, Docker

- Built a **Python-based AI application** using local LLMs via Ollama to analyze software repositories while keeping source code and proprietary context on the local machine.
- Designed a four-agent system – Repository Analyst, Code Quality, Security, and Lead Engineer – to perform specialized analysis and synthesize engineering findings.
- Combined LLM reasoning with deterministic signals from **Python AST, security, repository, and test analysis** to improve the consistency of generated findings.
- Enforced structured outputs using **Pydantic schemas**, producing machine-parseable findings and recommendations through a FastAPI backend and React dashboard.

Experience

MPOnline

May 2026 – Jul 2026

Advanced Software Engineering & Development Intern

Bhopal, India

- Gained hands-on exposure to AI/ML fundamentals, Generative AI, AI Agents, RAG, and workflow automation.
- Developed a **Library Management System**, applying object-oriented programming, database design, validation, debugging, and testing practices.
- Worked across Java, C++, C#, Python, DBMS/RDBMS, Git/GitHub, SDLC, and Agile development.

Certifications & Achievements

- **IBM Generative AI Professional Certification** – Score: 99/100
- **Oracle OCI Data Science Professional Certification**
- **TCS CodeVita** – Round 1 Qualified; Global Rank: 12,222
- **SolVIT Hackathon 2024** – Finalist
